Training the next generation

PMC is the only ACGME accredited teaching hospital within 50 miles. This accreditation is in partnership with Idaho State University Family Medicine Residency and is the foundational relationship of our significant collaboration with ISU. PMC is also the home to the University of Utah General Psychiatry Rural Track residency program. As a teaching hospital, PMC is committed to raising the bar in healthcare while also raising the next generation of providers. Family practice residents, pharmacists, nurses, medical technicians, dietitians and therapists train in the medical center.
